j.andrew.stam@gmail.com

PROFESSIONAL SUMMARY

Senior .NET Developer with 15+ years of experience designing, building, and modernizing enterprise backend systems using C#, ASP.NET Core, and SQL Server. Proven expertise in developing scalable REST APIs, optimizing database performance, and modernizing legacy platforms using architecture patterns such as CQRS, Repository Pattern, and Clean Architecture. Strong background in SQL Server database engineering, including schema design, stored procedures, query optimization, and data migrations. Experienced delivering secure, high-performance applications in Agile environments, collaborating across the full software lifecycle from design to production support. Familiar with modern development practices including CI/CD pipelines, containerization, automated testing, and cloud-based deployments.

TECHNICAL SKILLS

Languages & Frameworks:

C#, .NET 8 through 10, ASP.NET Core, .NET Framework, MVC, Web API, Entity Framework / EF Core

Database & SQL:

Microsoft SQL Server, T-SQL, Stored Procedures, Views, Functions, Schema Design, Indexing, Query Optimization, Performance Tuning, Data Migrations, Multi-tenant Architecture

Frontend & Integration:

Angular, TypeScript, JavaScript, REST APIs, JSON

Architecture & Practices:

Object-Oriented Design, CQRS, Repository Pattern, Legacy Modernization, Secure System Integrations, Clean Architecture

Tools & Platforms:

Azure (exposure), Git, GitLab, CI/CD Pipelines, Agile/Scrum, Docker, SSRS, Tableau BI

PROFESSIONAL EXPERIENCE

Software Developer III – Upperty (SEZC) Ltd. - January 2024 to January 2026

- Architected a multi-tenant database model by separating Primary and Tenant databases, improving scalability, maintainability, and data isolation.
- Led migration of legacy MySQL/MariaDB databases to PostgreSQL, managing schema transformation, data mapping, and validation.
- Refactored Entity Framework configurations to support accurate, high-performance data access across multiple data stores.
- Designed and built secure REST APIs integrating external systems for automated document ingestion and AI-driven processing workflows.
- Designed and implemented a scalable sales order workflow platform used by 20+ resellers, reducing manual order processing time by 60%.
- Developed a dynamic localization service providing multilingual UI support across the platform.

Environment: C#, ASP.NET Core, Entity Framework / EF Core, MySQL (MariaDB), JavaScript, Agile, Scrum, GitLab, Linux, Clean Architecture, Linux

Senior Software Developer - Book4Time Inc., Markham, ON - December 2022 to January 2024

- Developed and enhanced backend services and enterprise SaaS features using C#, ASP.NET Core, SQL Server, Angular, and TypeScript.
- Built high-availability REST APIs supporting thousands of daily transactions across enterprise SaaS clients.
- Designed and optimized SQL Server queries, stored procedures, and database structures to improve performance and reliability.
- Investigated and resolved complex production issues across application and database layers in collaboration with support teams.
- Contributed to modernization of legacy components by improving architecture patterns and code maintainability.
- Participated in Agile ceremonies, peer code reviews, and release cycles.

Environment: C#, ASP.Net Core, .Net Framework, MS SQL Server, Typescript, Angular, Agile, Scrum

Senior Developer – DMS Organization, Cayman Islands – January 2022 to July 2022

- Rebuilt a high-traffic buy-and-sell web platform from the ground up using ASP.NET Core, SQL Server, Angular, and TypeScript.
- Designed database schema and data access layers to support scalable application growth.
- Developed REST APIs and backend services to support frontend functionality and integrations.
- Participated in Salesforce administration and system support for multiple business units.

Environment: C#, ASP.Net Core, Entity Framework / EF Core, MS SQL Server, Typescript, Angular

Systems Programmer - Cayman Islands Monetary Authority, Cayman Islands - January 2020 to January 2022

- Designed, developed, and maintained regulatory enterprise systems using ASP.NET Core and SQL Server.
- Implemented CQRS and Repository design patterns to improve system structure and maintainability.
- Implemented automated unit and integration testing to validate application logic, API endpoints, and database interactions, improving system reliability and reducing production defects.
- Developed SQL Server database objects including stored procedures, views, and data transformation processes.
- Reduced deployment time by implementing structured SQL Server Database Projects across multiple systems.
- Built and maintained integrations between external regulatory websites and internal enterprise platforms.

Environment: C#, ASP.NET Core, .NET Framework, MVC, Web API, Entity Framework / EF Core, MS SQL Server, jQuery, JavaScript, Agile, Scrum, DevOps, xUnit/NUnit

Software Developer - DMS Fund Governance, Cayman Islands - February 2019 to January 2020

- Developed and maintained workflows, reports, and tools using .NET Framework and SQL Server.
- Built a secure client portal allowing external users to access documents and engagement information.
- Researched and resolved Salesforce platform issues related to quarterly maintenance releases.
- Supported backend systems and performed database updates and troubleshooting.

Environment: C#, ASP.Net Core, MS SQL Server, Git, Salesforce, Agile, Scrum

Lead Software Developer - ClearPay Canada Corporation, Toronto ON - May 2018 to December 2018

- Led technical strategy while remaining hands-on in development (50% leadership / 50% engineering).
- Managed two contract developers and worked closely with executive leadership on technology initiatives.
- Contributed to achieving SOC2 Type 1 certification through application and infrastructure improvements.
- Maintained and enhanced ASP.NET applications and SQL Server databases.
- Monitored performance metrics and maintained vendor relationships for hosting and security services.

Environment: C#, .Net Framework, MS SQL Server, Git

Contract SQL Developer - Brac Informatics Centre, Toronto ON - November 2017 to May 2018

- Developed and maintained stored procedures, SQL scripts, and C# web services supporting multiple web clients.
- Performed database troubleshooting, performance analysis, and query optimization.
- Produced business intelligence reporting using Tableau.
- Supported production systems by diagnosing and resolving database and application issues.

Environment: C#, .Net Framework, MS SQL Server, Tableau

Contract Web Developer - Harmonic Fund Services, Toronto ON - May 2017 to November 2017

- Developed enterprise web applications using ASP.NET MVC, SQL Server, Angular, and TypeScript.
- Designed backend logic, REST endpoints, and database queries for financial institution systems.
- Participated in code reviews to ensure optimized, maintainable code.
- Created unit tests to maintain stability and prevent regressions.

Environment: ASP.Net (C#), Angular, TypeScript, MS SQL Server, HTML, JSON

Contract Web Developer - DMS Fund Governance, Cayman Islands - October 2009 to March 2017

- Developed internal enterprise applications and integrations using C#, ASP.NET MVC, and SQL Server.
- Automated invoicing and digitized document workflows, reducing processing time from one week to approximately three hours.
- Built WCF web services and optimized SQL Server stored procedures.

Environment: C#, .Net Framework, ASP.NET MVC, WCF, MS SQL Server, SSRS, JavaScript, HTML

EDUCATION

Graduated 1992 **Computer Programmer/Analyst Course**

Georgian College of Applied Arts and Technology – Barrie Campus

Graduated from the Computer Programmer/Analyst program and received College Diploma. The course taught Introduction to Computer Based Systems, Systems Analysis and Design and gave the opportunity to develop a System project in the third year of the course, using the Systems Application Development Life Cycle.

Certifications **PCEP - Certified Entry-Level Python Programmer – October 2023**
